

Thank you for your interest in SmartMove Modular Conveyors. Requested literature detailing SmartMove gate conveyors is provided for your immediate review.

SmartMove Conveyors has been providing simple, safe, dependable conveyor solutions for more than 15 years. We offer a wide selection of product that are in stock and ready for immediate delivery. All of our conveyors provide the following benefits:

Save on installation: All SmartMove conveyors are shipped fully assembled and will be ready for operation upon delivery. There are no hidden costs for mechanical or electrical installation. And our removable power cord meets OSHA requirements for power lock-out.

Provide a safe work environment: No other conveyor can offer you the inherent safety provided with safer small torque motors. All of our drives have overload protection that shuts off the motor if stalled for more than 10 seconds. Plus, our belting provides a second safety defense by snapping open when jammed from underneath. Safe conveyors can improve your productivity by allowing workers to operate closer to the conveyor.

Modular and efficient: Modularly constructed to meet current and future needs at your facility. Save on operational electrical costs with our energy efficient variable speed brushless drives that use 80% less power than other conveyors. The information pack includes the following:

SmartMove Walk-Thru Gate Conveyor Crossings

Conveyor layout design has never been easier with SmartMove's Walk-Thru Gate systems. Including a conveyor crossing in your layout will allow you to make continuous loops, gain access to otherwise blocked pathways and provide the opportunity to go where you need to go with the conveyors.

To request a quotation on a SmartMove Walk-thru Gate system, please complete this form and send it along with a completed Short Line or Long Line worksheet.

**Idler Gate crossing requires preceding conveyor to be installed with gate sensor shut-off switch.*

Location	<i>(We recommend the Drive Gate crossing that shuts off feed while gate is open.)</i>
Walk-thru Clearance	Gate section will be 2" longer, 5" longer if using Folding Stand Option. <i>We recommend 36" long gate to a 34" walk-thru clearance. If you need a larger crossing width, please consider a dual system that uses a Drive at end gate combined with an Idler Gate crossing system to provide clearance up to 90"</i>
Ceiling Clearance	Ceiling clearance is required for gate open position <i>Gate length + Overall Conveyor Height = Clearance</i>
Product Length	Products under 3" will need back-pressure to cross joint at gate. <i>Gate can waterfall transfer for smaller products.</i>

Please include this information with the Short Line or Long Line worksheet
