

Thank you for your interest in SmartMove Modular Conveyors!!

SmartMove Conveyors has been providing simple, safe, dependable conveyor solutions for more than 15 years. We offer a wide selection of products that are in stock and ready for immediate delivery. All of our conveyors provide the following benefits:

- **Save on installation:** All SmartMove conveyors are shipped fully assembled and will be ready for operation upon delivery. There are no hidden costs for mechanical or electrical installation. And our removable power cord meets OSHA requirements for power lock-out.
- **Provide a safe work environment:** No other conveyor can offer you the inherent safety provided with safer small torque motors. All of our drives have overload protection that shuts off the motor if stalled for more than 10 seconds. Plus, our belting provides a second safety defense by snapping open when jammed from underneath. Safe conveyors can improve your productivity by allowing workers to operate closer to the conveyor.
- **Modular and efficient:** Modularly constructed to meet current and future needs at your facility. Save on operational electrical costs with our energy efficient variable speed brushless drives that use 80% less power than other conveyors.

Requested literature detailing SmartMove short-line conveyors is provided for your immediate review. This information pack includes the following:

- ✓ [Conveyor Worksheet](#)
- ✓ [Detailed Product Description](#)
- ✓ [CAD Drawing](#)
- ✓ [Accessories Photo](#)

If you have any questions regarding any SmartMove Conveyor product, I can be reached directly at (800) 581-2876 or by email at Sales@4smartmove.com.

SmartMove Conveyor Multi-level Systems

Save space. Increase productivity. Reduce lost motion.

Simple installation

SmartMove's lightweight and internally supported lower belt path make multi-level systems simple and safe to operate. Simply assemble the lower line, add upright supports with built-in staging and then install the upper level. Joiner bars are used on upper levels to join sections to create continuous lines up to 60' long. Our unique non-dusting snap-link belting does not require tracking or tensioning.

Deliver and take-away systems

Our most popular application for multi-levels in the distribution mail-order industry where one level is used to deliver boxes while the other provides a take-away system. SmartMove's built-in guide rails and low friction belting are ideal for sliding under boxes as they are held accumulated on the lower level.

Note: All conveyors in multi-level system must be the same width SmartMove Conveyors.

Please request Multi-Level Supports and specify clearances when requesting quote.

Also available in 3 levels.
